Website Development And Planning

Website Product Marketing, Price, and Planning

At Optical Automation we research and develop Full Stack websites. That is a ReactJS as a MERN database product. In a practical send you could sell your products and services by eCommerce website and financial transactor. Marketing develops traffic to your website or product offering. By Facebook or Google advertising on your first few pages of your website will bring traffic to your business or perpersonal portfolio website.

We make performant *FAST* industry standard ReactJS database websites. We create Responsive Website Design navigation bars so your client can find your pages of information easily. We offer CSS3 website formatting for your information and text information. We have many many examples over the past half decade of professional programming research coding examples. By use of our tools, computer, software, and the Internet we get systems that are the industry finest.

The computer is a Apple MacMini model running Ventura, the latest MacOS, Version 13.4.1. We use the finest editor – terminal software made by Microsoft, Visual Studio Code and their latest upgrade. We use Meta Corporation ReactJS language supported by NodeJS and their latest build. And finally we are supported by MongoDB Corporation Atlas and Compass model of database to run as MERN. That stands for MongoDB, ExpressJS, ReactJS, and NodeJS. This comprises The MERN Full Stack of website database software.

Website Development And Planning

Technologies offered include the following:

MERN, MongoDB, ExpressJS, ReactJS, and NodeJS technologies
CSS3, Bootstrap, and TailwindCSS and
Netlify deployment for your Internet Domain Name

Engineers get paid money professionally. This includes medical, an average forty hour work week, and lots of creative energy and expertise in producing a performant, colorful, and ingagaging website set of website pages. The average entry level engineer makes \$ 80,000, or \$ 40 an hour up to \$ 200,000, \$ 105 an hour. And more over a business, purchased by venture capialists will pay hundreds of thousands of dollars for a team of these engineers. We are offering a single point of contact engineer at \$ 50 an hour. This presents a tremendous advantage and opportunity for you as the client.

Pricing of our websites are offered at \$ 50 an hour of work. It usually takes 100 hours of work or two and a half months of time. At full time 40 hours a week of work our talent will present you a complete website in your choice of formats, color, and information components. As a full size website, use of our Responsive Website Design, you get additional sized formats to include Tablet and Cellphone size website products. So when your client access your website by computer, laptop, tablet, and cellphone each will display fast and clearly for your business. That's quality from Optical Automation, LLC in Tarzana, California 91356
