OPTICAL AUTOMATION

"Information At The Speed Of Light"

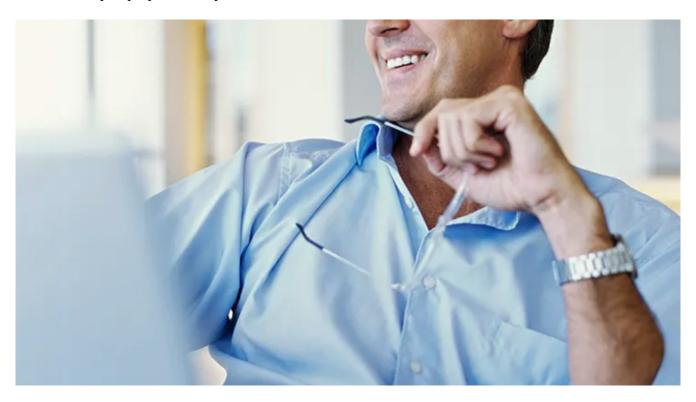

Professional Information Technologies

Website Product Marketing, Price, and Planning

At Optical Automation we research and develop Full Stack websites. That is a ReactJS as a MERN database product. In a practical send you could sell your products and services by eCommerce website and financial transactor. Marketing develops traffic to your website or product offering. By Facebook or Google advertising on your first few pages of your website will bring traffic to your business or perpersonal portfolio website.

We make industry standard ReactJS websites. We offer CSS3 website formatting for your information and text information. We create Responsive Website Design navigation bars so your client can find your pages of information easily.

Technologies offered include the following:

MERN, MongoDB, ExpressJS, ReactJS, and NodeJS technologies
CSS3, Bootstrap, and TailwindCSS and
Netlify deployment for your Internet Domain Name

Pricing of our websites are offered at $ 50 an hour of work. It usually takes 100 hours of work or two and a half months of time. At full time 40 hours a week of work our talent will present you a complete website in your choice of formats, color, and information components. As a full size website, use of our Responsive Website Design, you get additional sized formats to include Tablet and Cellphone size website products. So when your client access your website by computer, laptop, tablet, and cellphone each will display fast and clearly for your business. That's quality from Optical Automation, LLC in Tarzana, California 91356
